

Town of Brazeau Vision Statement (adopted August 2008)

The Town of Brazeau's diverse landscape includes an abundance of forestlands, quality agricultural land, and scenic lakes and rivers. Development is sensitive to the natural environment, and primarily situated within or near the town's two sanitary districts, creating an inviting community for quality residential living and tourist-related activities. The town's collection of parks and trails contribute to the town's rural makeup, providing opportunities for recreation to residents and visitors.
